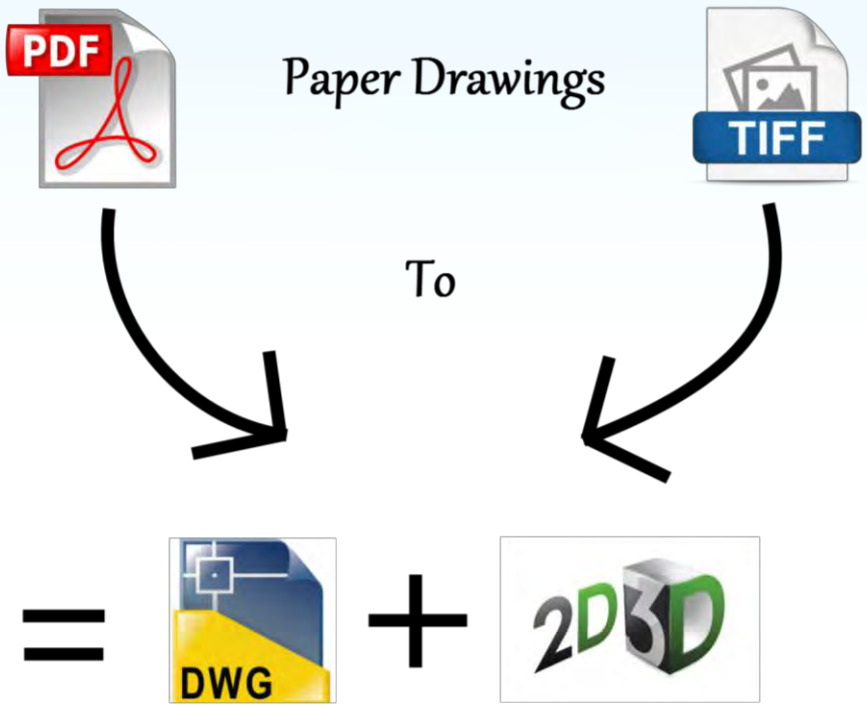
CSoft 2017

A Presentation on

CAD Digitization

CSoft



CSoft Service

Over the last few years, we have converted many thousands paper drawings to accurate CAD drawings. We have indexed and renamed millions of documents and drawings and successfully completed several thousands of CAD Models & Drafting Projects.

Get innovative and cost-effective solutions in less time and pass on the productivity gains to our clients.

We use innovative technology and specialize in solutions on several CAD platforms. We are also technically equipped to adapt to our client's software environment and system.

About CAD Conversion

We deliver solutions to convert paper, PDF and scan-based drawings into accurate CAD drawings. We manually re-draft using CAD on all necessary conversions, making reference to the original hard-copy or raster-based drawings.

Our experts have the capacity and skills to handle drawings from all types of engineering, including Civil, Architecture, Structural, Mechanical, Electrical Engineering, Fabrication and Ship Building.

We use a wide range of software such as: AutoCAD; Revit; Navisworks; MicroStation; 3DS Max, Maya, VectorWorks; SolidWorks; Catia V5; Creo (Pro E), ArcInfo (GIS & Data Conversion); Aero Space; Visio. The output can be in the format of .dwg, .dwfx, .dgn, .acis, .dwf and others. All the drawings will have high-level of quality and accuracy in output.

Why CSoft

for CAD Digitization

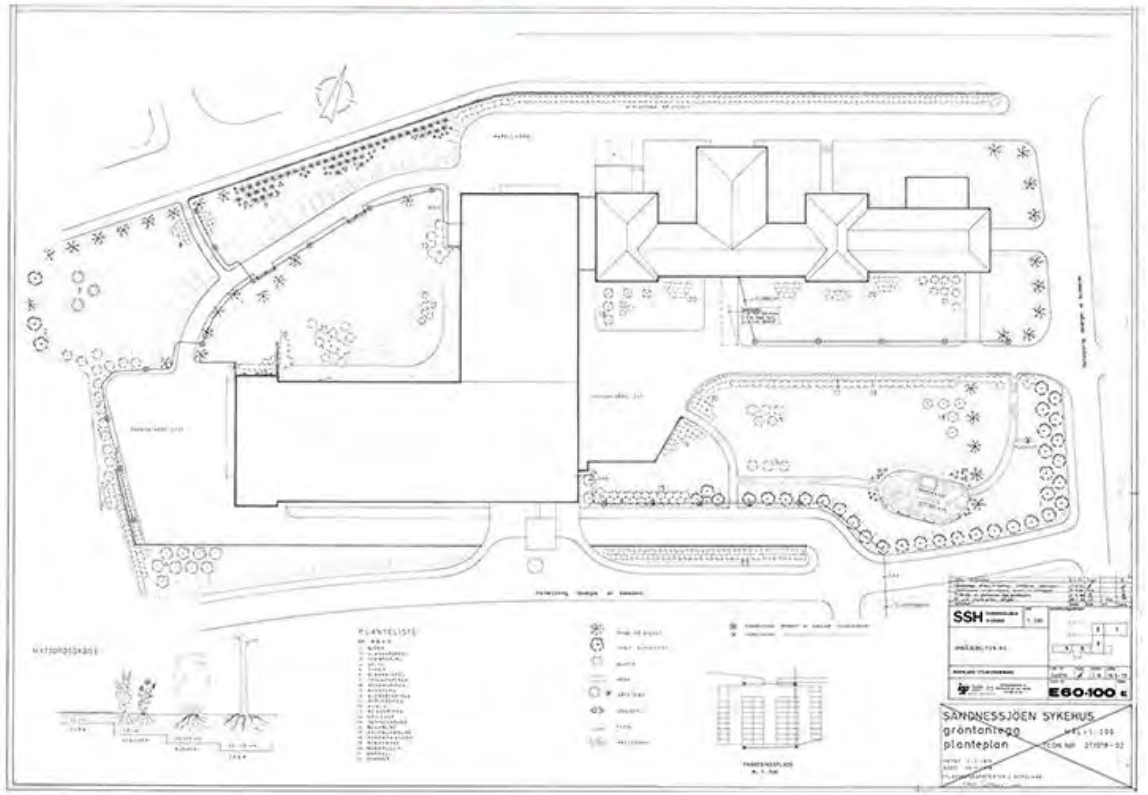
We specialize in conversion of legacy paper drawings into accurate CAD drawings as per client's CAD Standards or as per the prevalent International Standards. We are well equipped to efficiently handle almost all CAD platforms.

We specialize in conversion of all types of paper drawings, like :

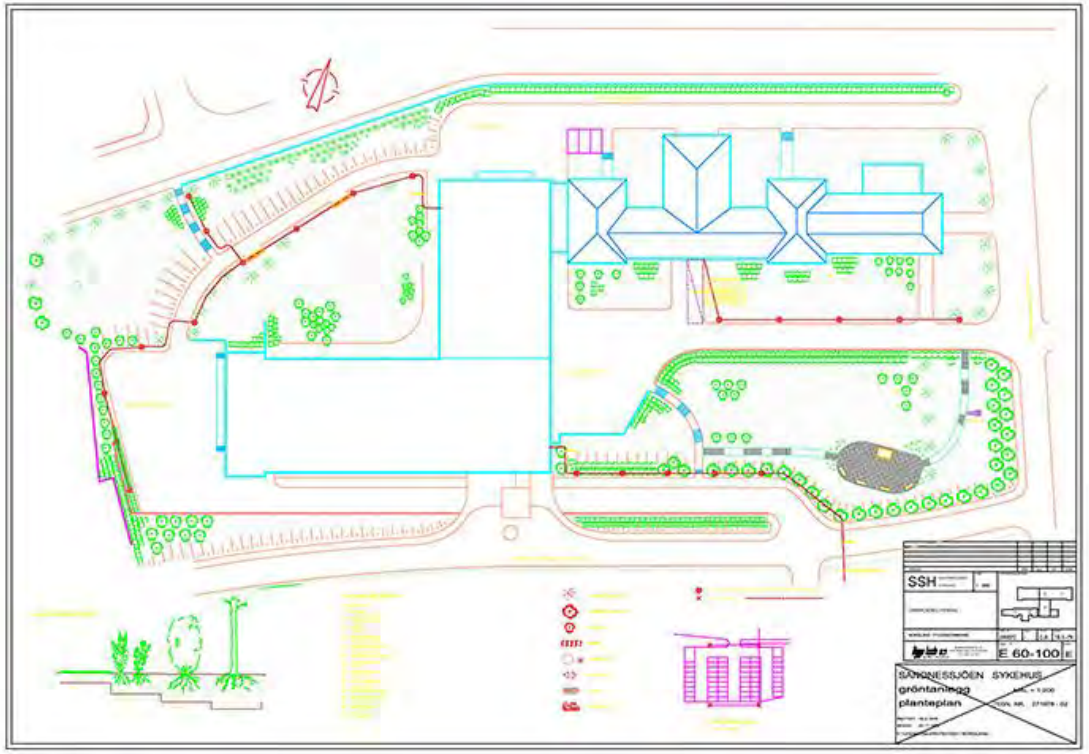
- Architectural
- Engineering (Civil, Mech, Elect.)
- Site Plan
- Surveying
- Contour Maps

CAD Digitization Sample Work

Input: JPG File



Output: CAD File

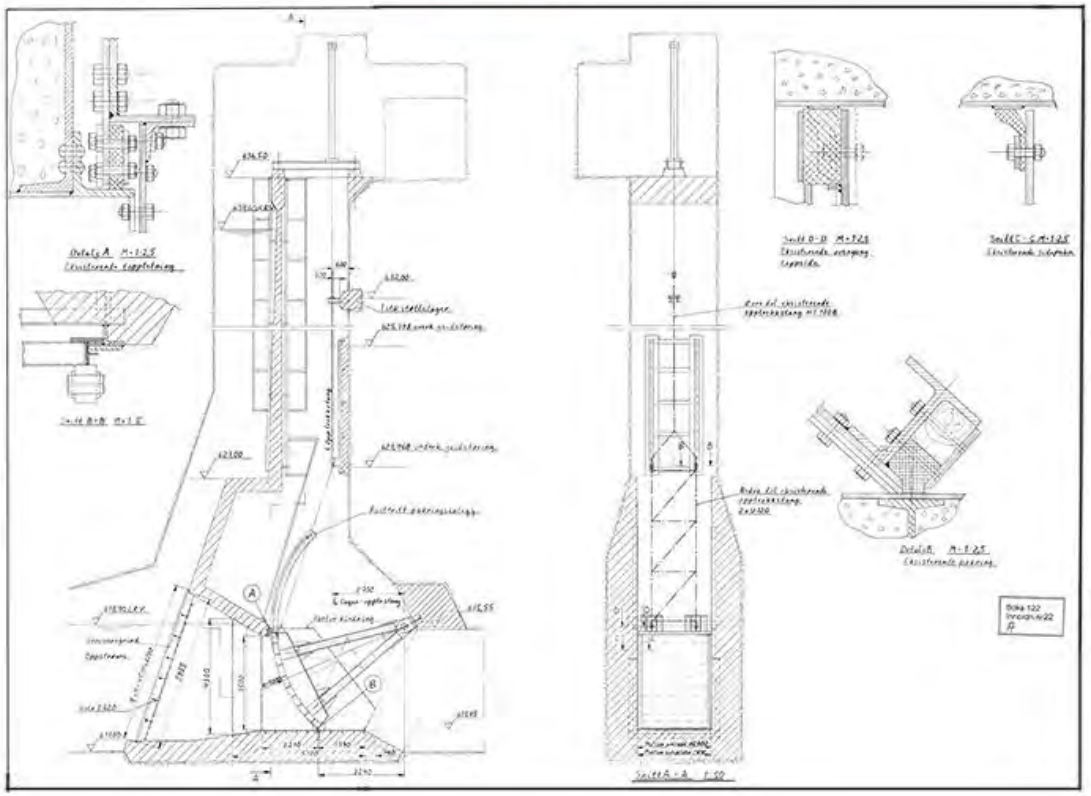


Scope of work:

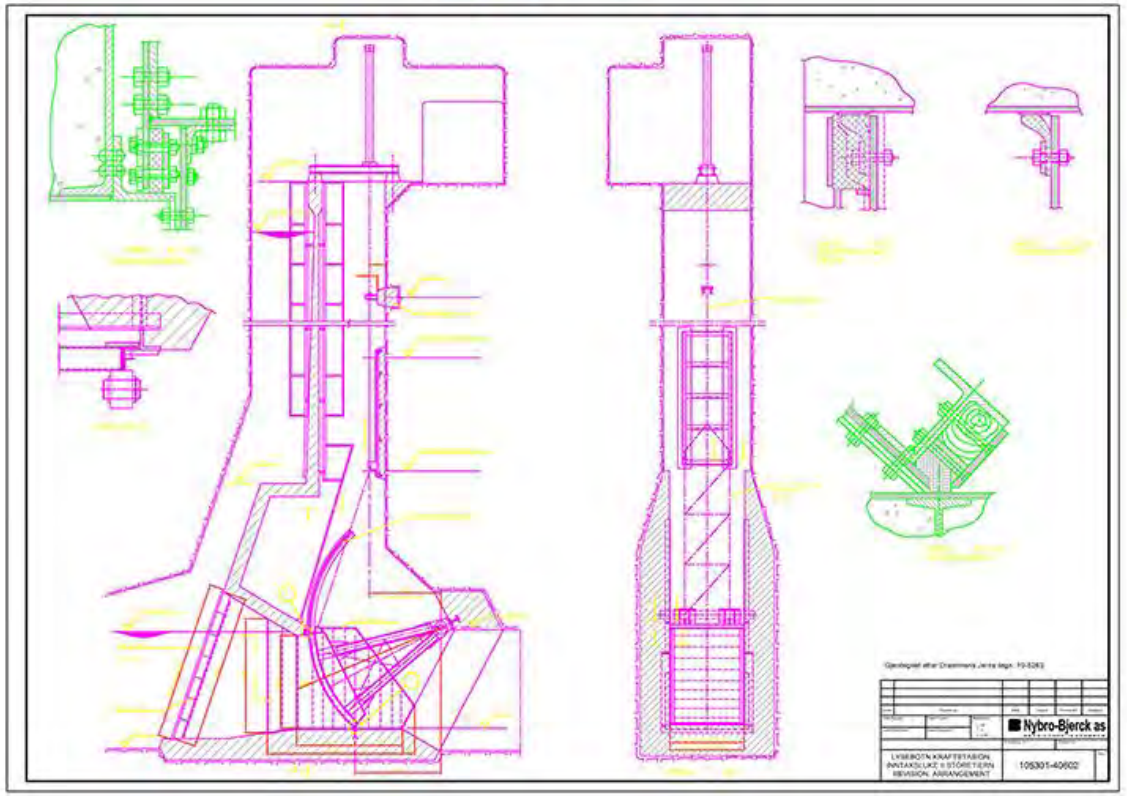
JPG to CAD Digitization

CAD Digitization Sample Work

Input : Tiff File



Output: CAD File

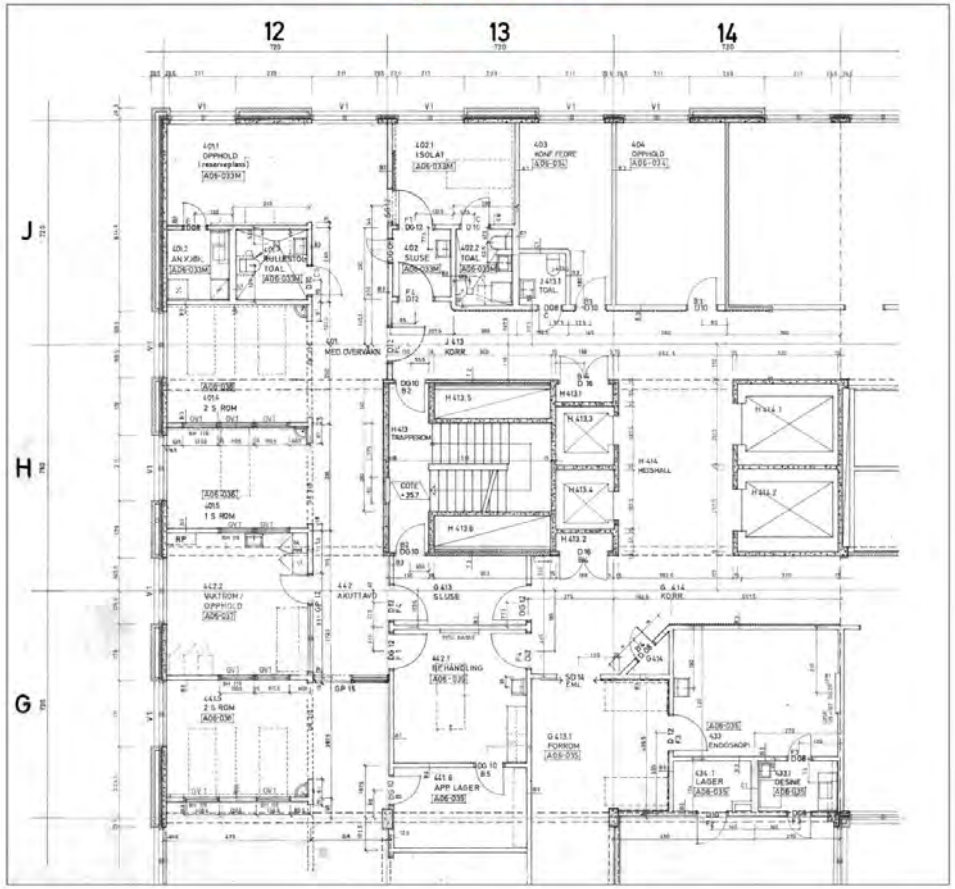


Scope of work:

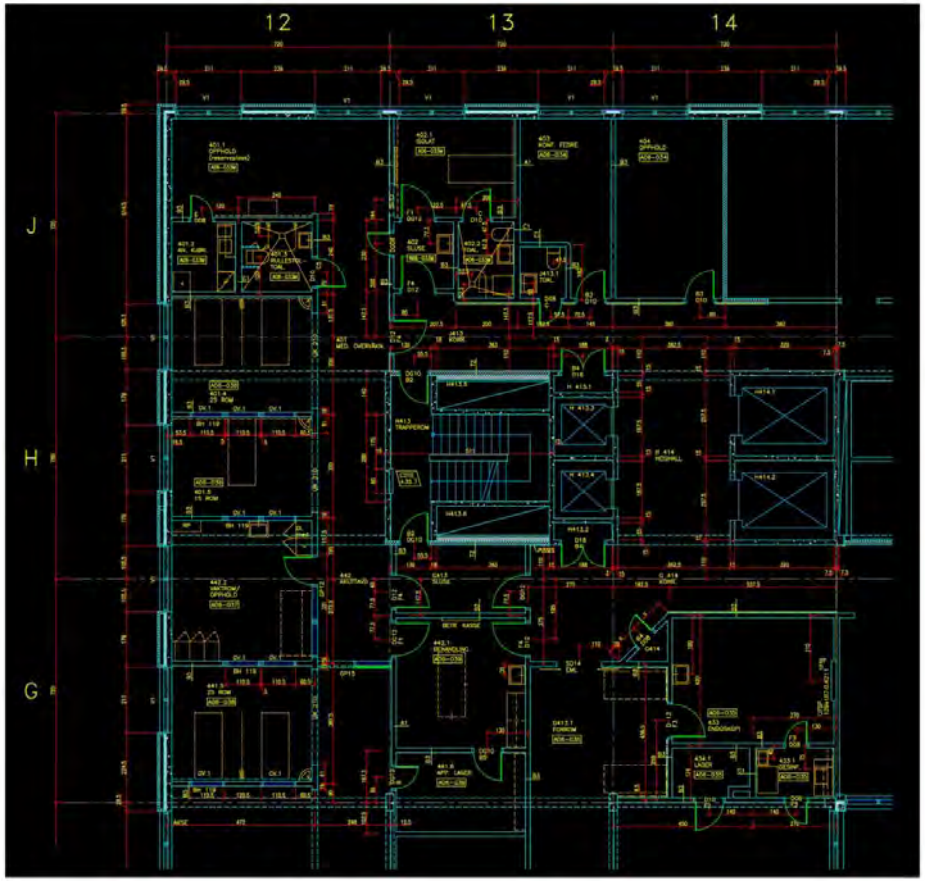
TIFF to CAD Digitization

Sample

Input : PDF Files



Output : CAD Files



Scope of work:

PDF to CAD Digitization
